Research Questions

RQ1: What are the *moral framings of mental health* discussions on Twitter and News?

RQ2: How *stigmatized* are these discussions?

RQ3: How do *moral foundations and stigma relate to each other* in these two types of mental health discourse?

Contributions

- Explored *human moral values* in the context of mental health
 - Using the lens of Moral Foundation Theory (MFT) [1]
- Performed a *cross-media analysis* of mental health framings
- Curated a human- and empirically-validated *dictionary to study stigma*

Method

Moral framing: Moral Foundations Theory [1]

Care/Harm
(Virtues of kindness)

Fairness/Cheating
(Ideas of justice, rights)

Loyalty/Betrayal
(Patriotism)

Authority/Subversion
(Leadership)

Sanctity/Degradation
(Religious notions)

[1] Jonathan Haidt. 2013. Moral psychology for the twenty-first century. *Journal of Moral Education* 42, 3 (2013), 281–297.

Method

Moral framing: Moral Foundations Dictionary

Virtue component

Care
(kind, protect, compassion,
comfort, empathize)

Vice component

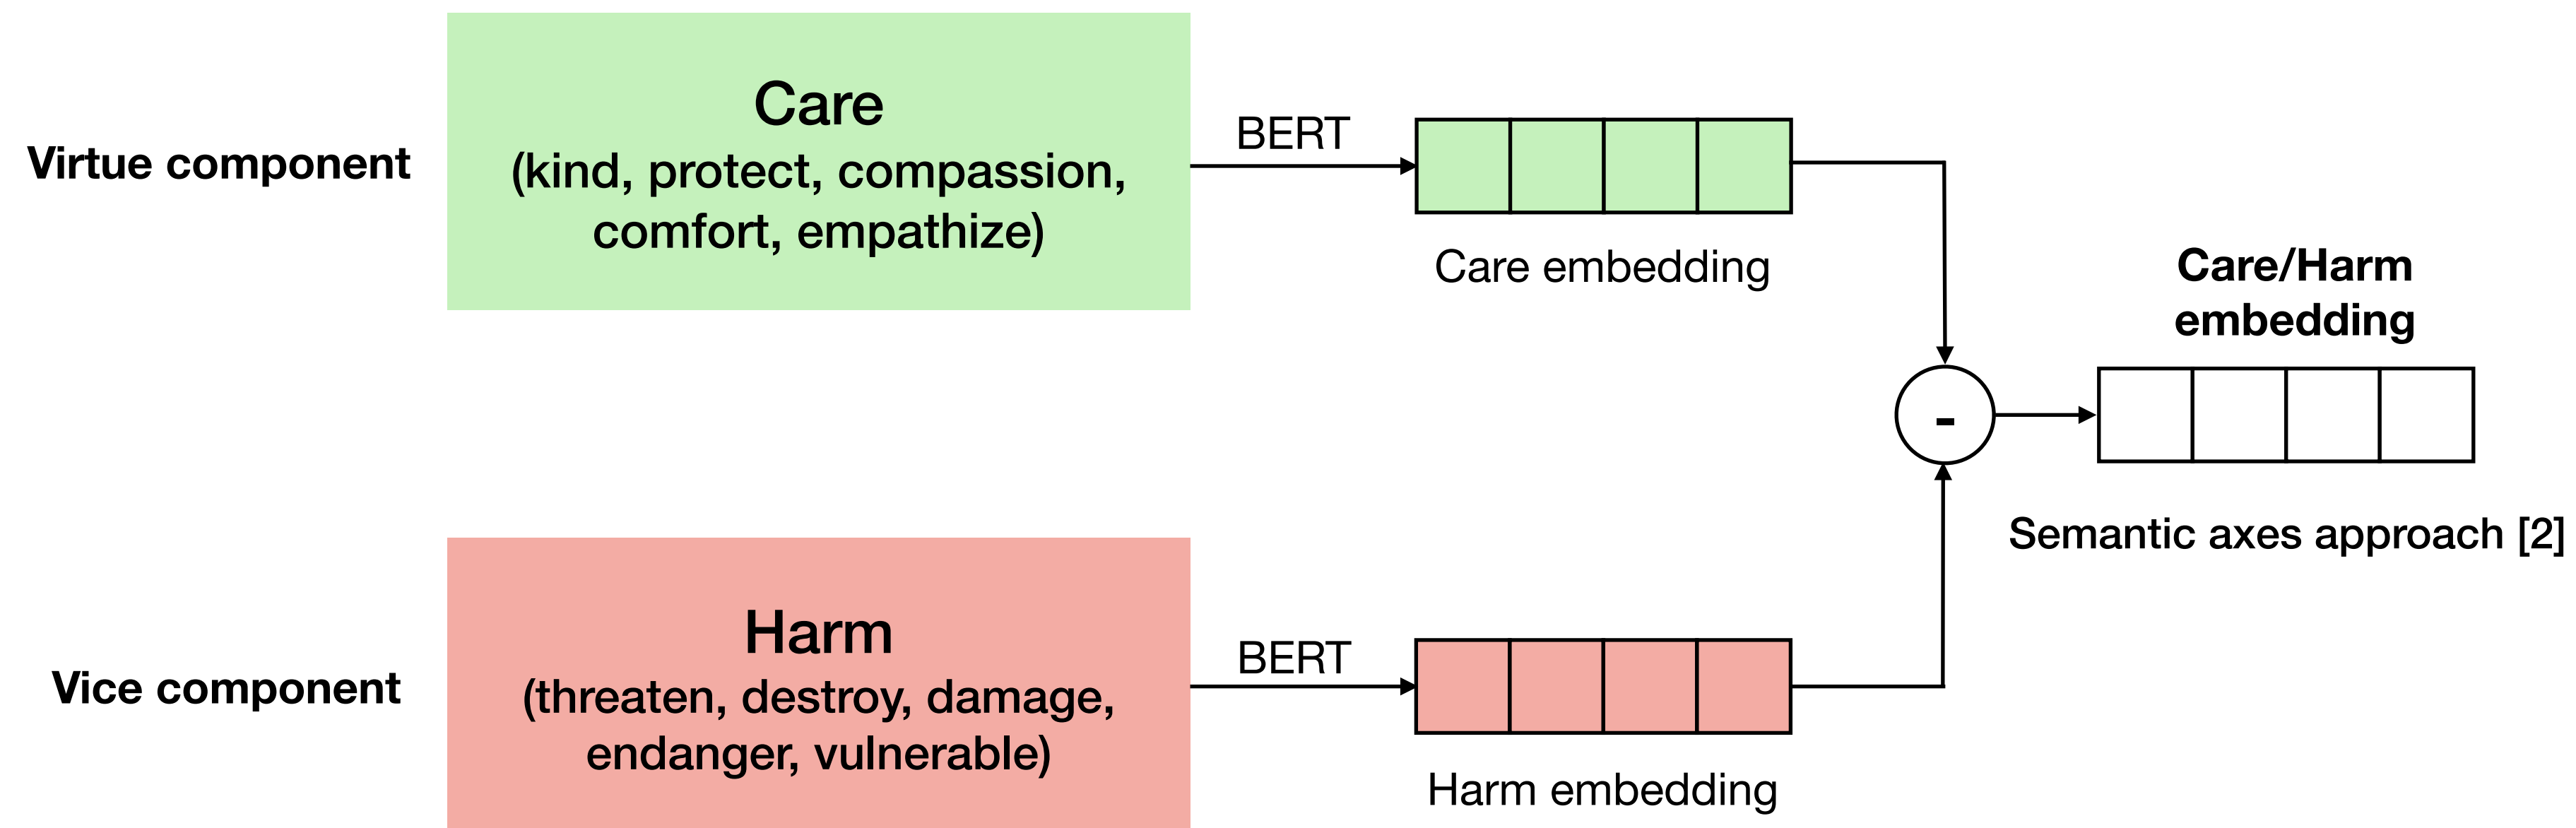

Harm
(threaten, destroy, damage,
endanger, vulnerable)

Method

Moral framing: Moral Foundations Dictionary [1] + Representation learning (BERT)

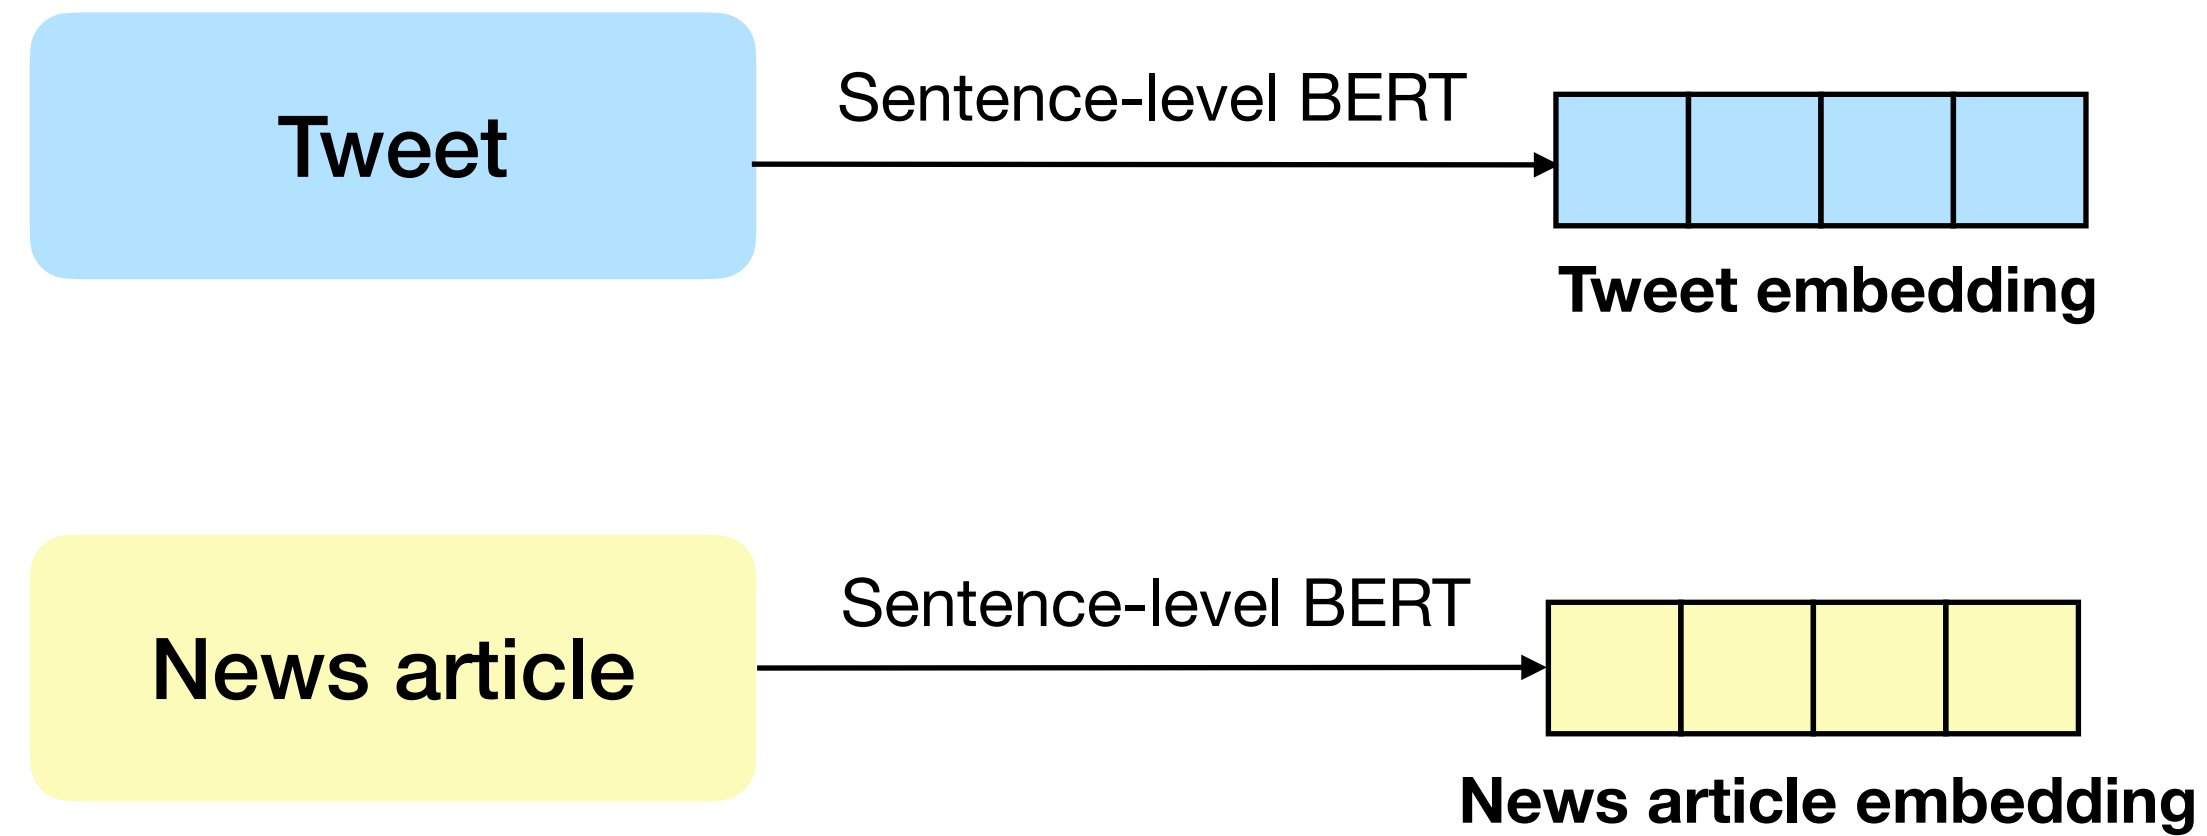

[1] Jeremy A Frimer. 2019. Moral Foundations Dictionary 2.0. <https://doi.org/10.17605/OSF.IO/EZN37>

[2] Jisun An, Haewoon Kwak, and Yong-Yeol Ahn. 2018. SemAxis: A Lightweight Framework to Characterize Domain-Specific Word Semantics Beyond Sentiment. <https://doi.org/10.48550/ARXIV.1806.05521>

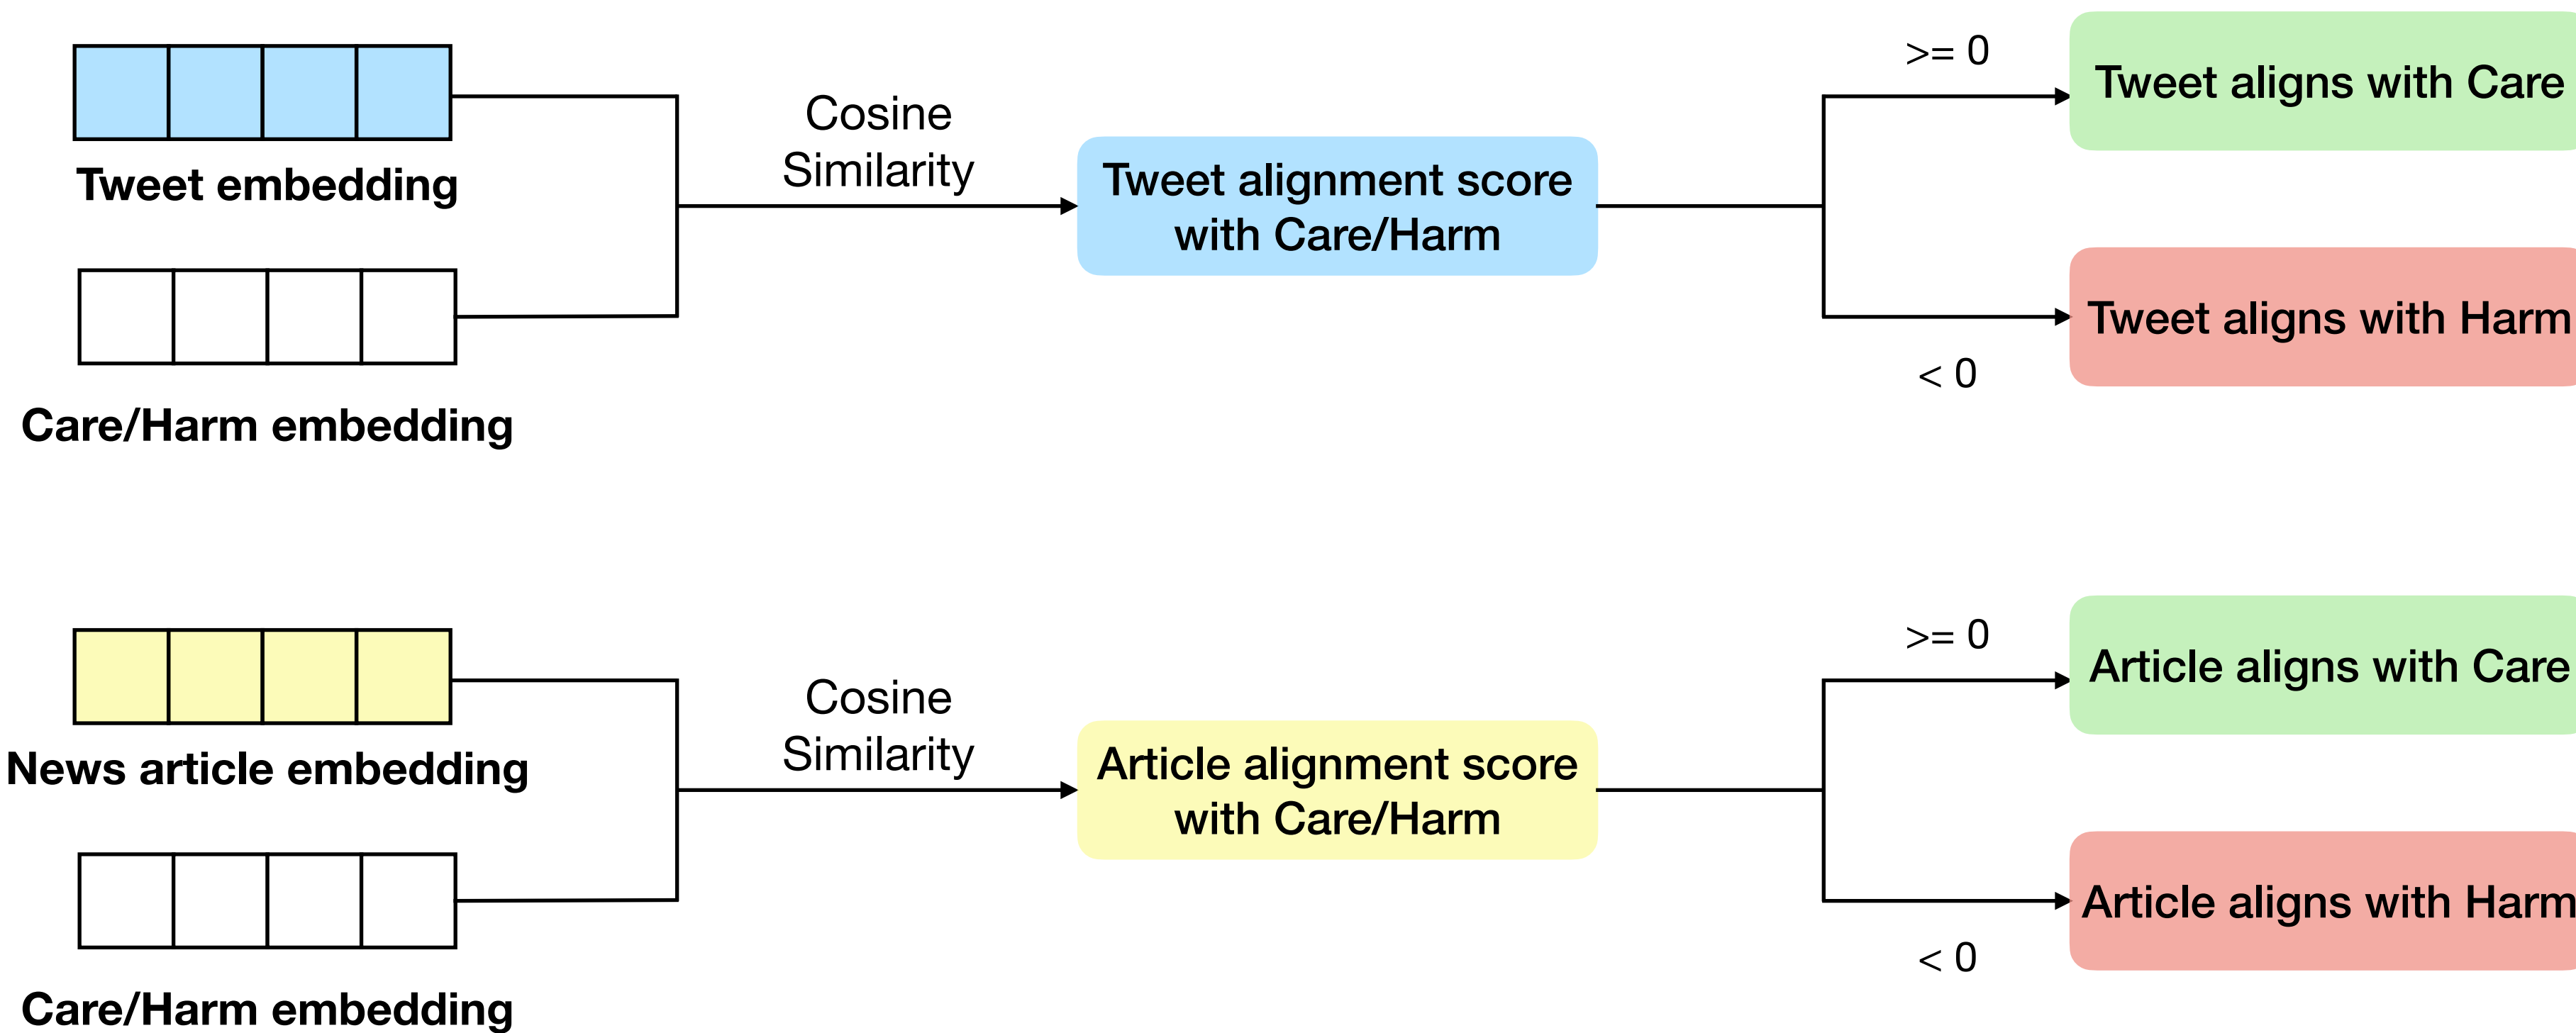

Method

Representation of Tweets and News articles

Method

Quantify moral framing of tweets and news articles

Method

Measure stigma

We measured levels of stigma using a novel Approval/Stigma frame

Referred to existing literature on stigma to get seed keywords for stigma (approval) dimensions [1, 2, 3]

Expanded by adding relevant synonyms using WordNet

Approval
(support, consent, accept,
regard, admission)

Stigma
(humiliation, disgrace, outlaw,
taboo, hatred)

[1] Erving Gofman. 2014. Stigma. In *Classic and Contemporary Readings in Sociology*. Routledge, 108–113.

[3] Alina Pavlova and Pauwke Berkers. 2020. “Mental Health” as Defined by Twitter: Frames, Emotions, Stigma. *Health Communication* (Dec. 2020).

Results

RQ1: Moral framings of mental health on Twitter vs. News

Twitter demonstrates presence of virtue facets more in comparison to News

Moral Foundation	Twitter Ratio (+ve/-ve)	News Ratio (+ve/-ve)
Care/Harm	11.674	0.536
Fairness/Cheating	3.121	0.289
Loyalty/Betrayal	3.847	0.137

+ve (-ve) represents the number of tweets or news articles that align with the virtue (vice) facet of the moral foundation.

Results

RQ2: Stigmatized mental health discussions

Stigmatized framings were more pronounced on both Twitter and News

Twitter uses more approval-based framings compared to News

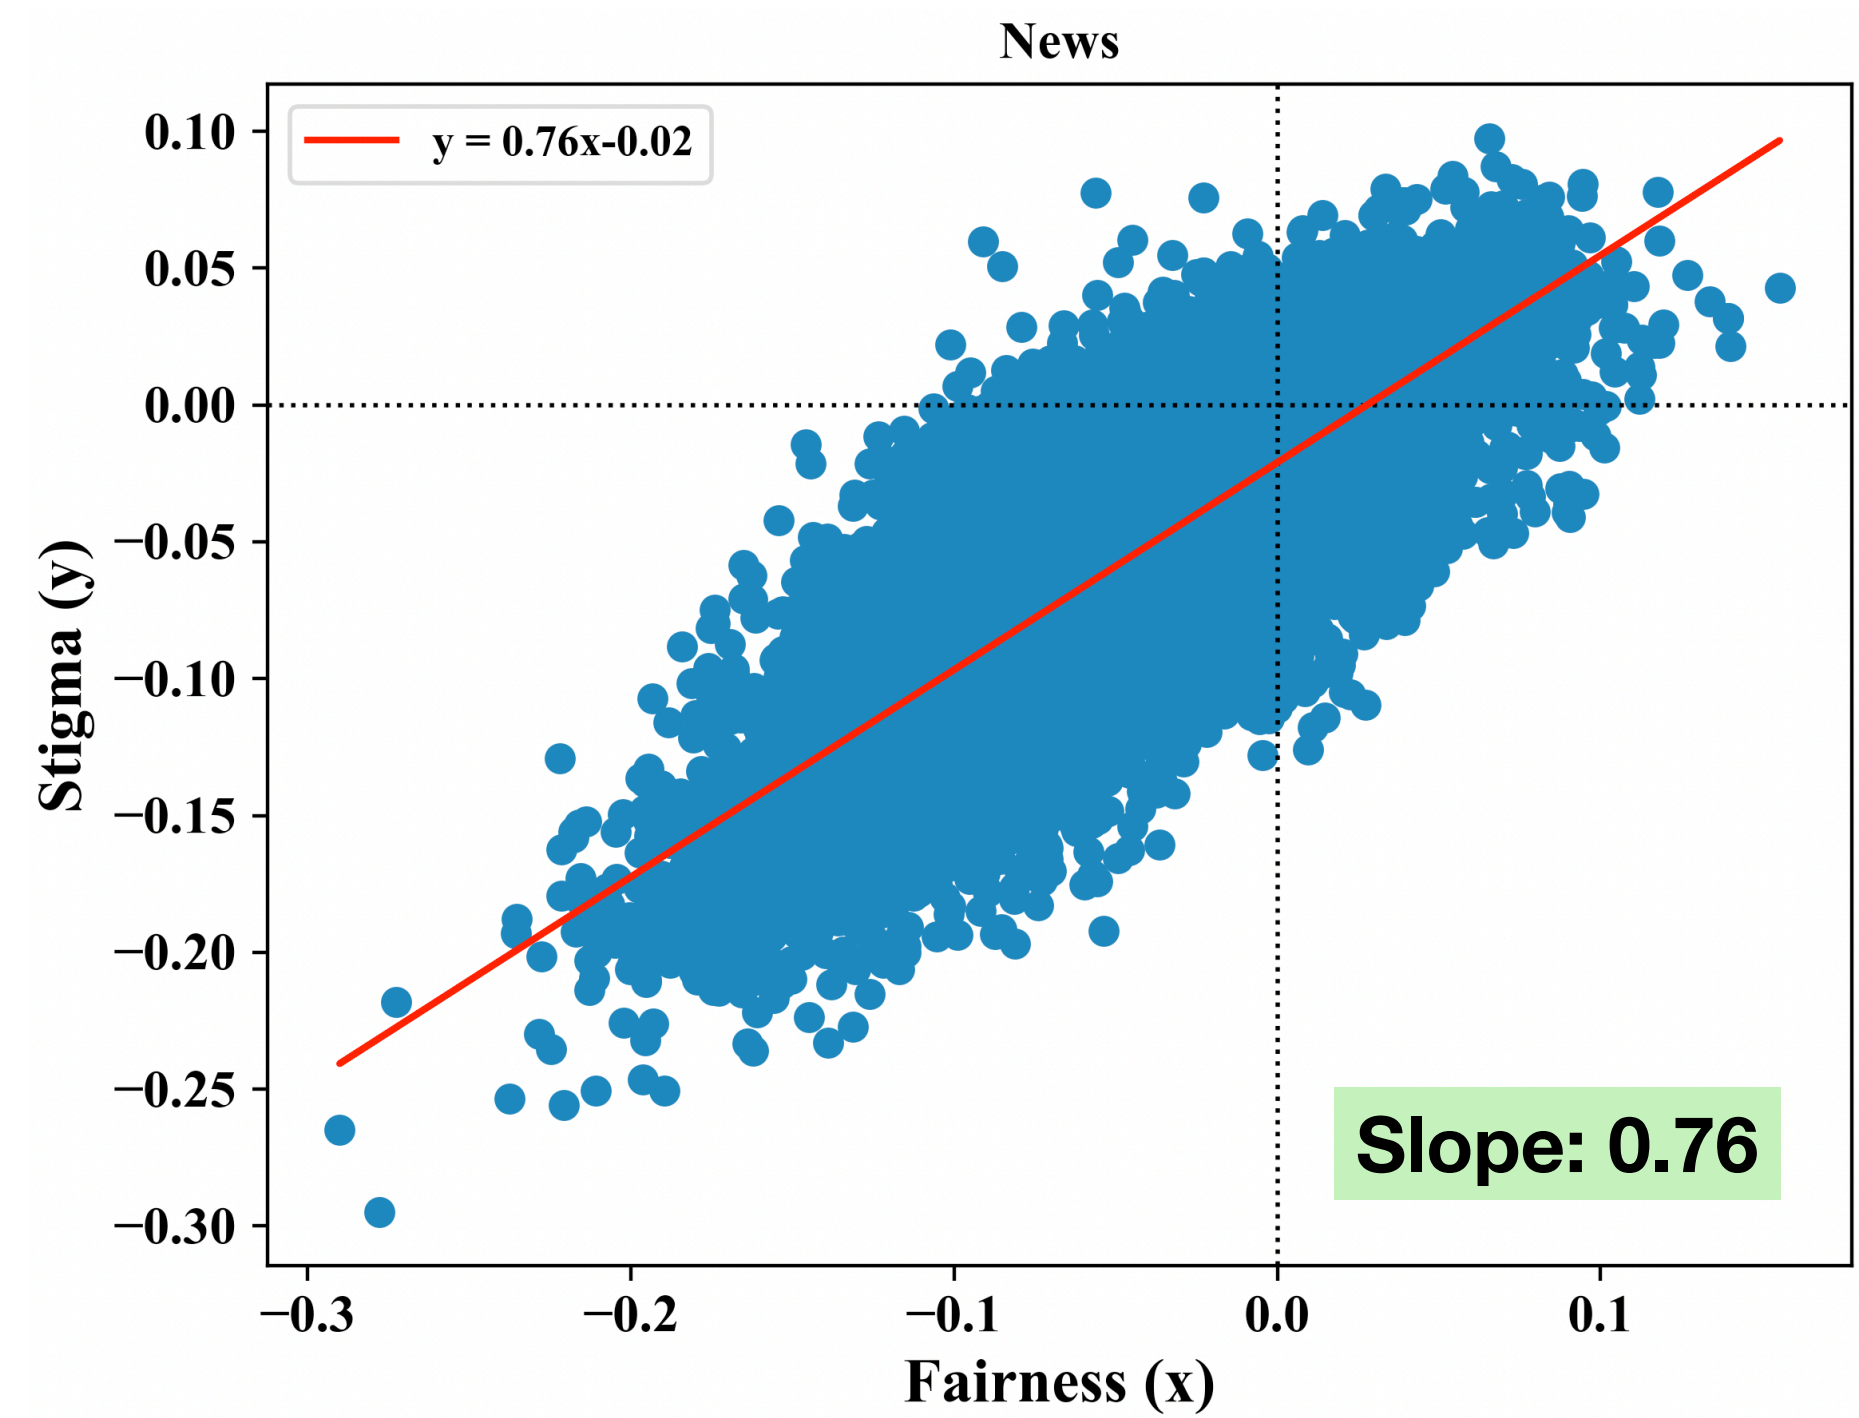

Platform	#Approval	#Stigma	Ratio (+ve/-ve)
Twitter	5,528,120	7,748,995	0.713
News	3,011	18,156	0.166

'#' represents the number of tweets or news articles.

Results

RQ3: Relationship between moral frames and stigma

Virtue-oriented framings use an approving tone and vice versa

Results

RQ3: Relationship between moral frames and stigma

De-stigmatize
depression

“Is a Teen Depressed, or Just Moody?: [...] **Electronic media usage is not a cause of depression** [...] that’s how they connect to their peer group, get support [...], the message to parents and pediatricians is that we should **not associate depression with adolescence and make them feel equal.**”

Fairness virtue

Key Takeaways

Recommendations to support improved framings

Strengthen journalistic resource guides

Careful introduction of algorithmic nudges and recommendations [1]

Introduce educational resources and information campaigns [2]

[1] Ashish Sharma, Inna W Lin, Adam S Miner, David C Atkins, and Tim Althoff. 2021. Towards facilitating empathic conversations in online mental health support: A reinforcement learning approach. In Proceedings of the Web Conference 2021. 194–205.

[2] Barbara Ricci and Lisa Dixon. 2015. What can we do about stigma? Psychiatric Services 66, 10 (2015), 1009–1009.

Summary

- Moral framings **quantified using Moral Foundation Theory**
- Introduced a new **lexical resource to study stigma**
- Tweets or news articles with **vicious moral framings tended to be stigmatizing**
- Limitations and Future work
 - Impact or influence of mental health framings on consumers

Summary

- Moral framings **quantified using Moral Foundation Theory**
- Introduced a new **lexical resource to study stigma**
- Tweets or news articles with **vicious moral framings tended to be stigmatizing**
- Limitations and Future work
 - Impact or influence of mental health framings on consumers
